

Description

The 5700 Manual Swing Gate offers an affordable solution for a wide range of parking, road access, and traffic management needs. It is particularly well-suited for situations where a fully automated barrier or gate entry system is either unnecessary or not cost-effective.

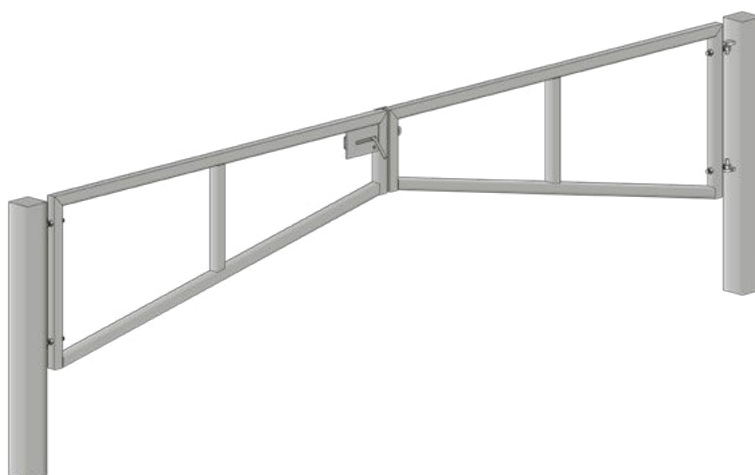

Key features of the 5700 Swing Gate include:
Single or Double Leaf Versions: You can choose between a single or double leaf configuration based on your requirements.

Standard or Heavy Duty Construction: The gate is available in both standard and heavy-duty box section variants.

Robust Structure: Constructed from high-quality steel hollow box section, the 5700 Swing Gate is sturdy and durable. It is ideal for deployment in unmanned areas with low traffic volume.

Lockable Positions: The gate can be securely locked in either the open or closed position using an additional latch post and padlock. This feature ensures excellent security when needed.

Whether it's controlling access to a parking lot, managing road traffic, or enhancing security, the 5700 Swing Gate provides a reliable and practical solution.
